Subject: EPA ETS Assessment release -> Status Report
Thanks for speeding up my procedures. - Due to the changes (& X-mas) I have not had a chance to speak to Frederick's successor.Will raise issue with Legal. (I also have a need to find a formula for controlling our trained partners from companies like Langaard and Amer). - However, I have reviewed your training tapes with Burson London and come to the conclusion that you are up to (good) EEMA standards as an ETS spokesperson.So, assuming you stick to the PM Spokesperson guide, i e our agreed positions on ETS and accommodation, GO AHEAD and fight (potential) EPA and other Swiss ETS based threats.
Regards, Stig

In the context of Marie-Claire's note, being addressed as an EEMA pre-approved ETS spokesperson, may I still clear the formal side.

With letter, dated November 27,1992, you kindly informed me on the forwarding of your recommendation to Legal to add me to the list of pre-approved spokespersons on ETS-related issues.

Has your recommendation in the meantime been confirmed by Legal ?

ULC

I look forward receiving from all of those who are copied on this note, their availability as an EEMA pre-approved ETS spokesperson during the days of Januar y 7th and 8th with a view to the presumed release of the EPA report.
We in EEMA are proud that we have the availability of the official spokespersons and we need to count on you at least during the first two days continuously in case we are asked for comments/reactions.
Moreover, I would appreciate an indication of your availability for the week of 11-15 January 1993.
I would appreciate your reply by 15.oo this afternoon at the latest, as I then can send out an EEMA status report to the various units.
(Could JPuotila or IBonnier check with Lasse whether he would be available for local political issues? And whether Truls is also on stand-by? - He is only to go out in media after preparation!)
Regards,
Marie Claire
